

Deepfield Connect takes over monitoring systems from Bosch!

Since the beginning of 2021, Deepfield Connect by FoundersLane took over the former Bosch monitoring systems. This applies to all asparagus and field monitoring systems.

The conditions remain the same:

- The systems are available with an annual subscription fee
- A free replacement service: for damaged systems or the shipment of new batteries
- Access your data via the app or on your web browser

Existing customers benefit from transferring their historical data to the new platform and receive a 10% discount with every system that is being renewed.

Please visit our website for more information, [click here](#)

If you are interested in our product as a new customer, I would be pleased to assist you.

If you have any further questions, please do not hesitate to contact me. I can also be via our chat room <https://www.deepfield-connect.com/en/home>.

The new Deepfield Connect team is looking forward to welcoming you as our customer.
